

Join us at RANZCO National Congress 2008

Hands-on workshop for operators: IOLMaster & OCT

Monday, 24th November 2008 | 6:00 - 9:00pm

Crowne Plaza Melbourne, Bridge Room 2, 1 - 5 Spencer St, Melbourne VIC 3005

Carl Zeiss is pleased to invite you to an intensive hands-on workshop and update on two of its most important technologies: the IOLMaster and optical coherence tomography (OCT). Both technologies have become an integral part of many practices in Australia and New Zealand and changed the way we work in many ways. As the pioneers of both technologies, Carl Zeiss has made an important contribution to ophthalmology and continues to invest heavily in further development of each.

This workshop continues the contribution locally and is aimed at the operators of the equipment, so please pass this invitation onto your orthoptists and technicians.

Matthew Wensor
Product Manager
Ophthalmic Systems
Carl Zeiss Australasia

6:00pm	Welcome drinks & canapes	
6:30pm	Technology update	Matthew Wensor
