

EYE HEALTH FORUM - vision initiatives in NSW

8.30 - 4pm

Friday 12 March 2010

Novotel, Sydney Olympic Park

The Statewide Ophthalmology Service (SOS), a network of the Greater Metropolitan Clinical Taskforce (GMCT) is organizing and funding the Eye Forum to showcase vision initiatives in NSW which support the action areas of the National Framework for Action to Promote Eye Health & Prevent Avoidable Blindness & Vision Loss (National Framework). Speakers from across vision and eye health sectors including health, low vision and rehabilitation, academia and professional associations have agreed to participate.

It's a great chance for clinicians, service providers, policy makers and managers in these areas to hear how NSW is addressing the National Framework.

A facilitated discussion will be held at the end of the day to:

1. Consider how to provide continuous & current access to expert opinion & accurate reporting of activities across the entire vision and eye health sector in NSW and
2. Identify and prioritize five issues to be addressed over the next three years.

Registration is available at:

www.health.nsw.gov.au/gmct/events.asp
